

INDUSTRIAL EQUIPMENT SINGLE SOURCE OF SPEED

DESIGN, SOURCE, PRODUCE & SERVICE FAST ANYWHERE

**CAN WE ACCELERATE
YOUR PRODUCT
DEVELOPMENT, IN ANY
OF YOUR LOCATIONS, IN
A SUSTAINABLE WAY?**

Being an efficient industrial equipment actor today in a very competitive market requires the ability to define and produce customized products in record speed, across several locations. And to maintain installed equipment at any customer location on the globe.

Our Single Source of Speed **3DEXPERIENCE** liberates and accelerates your product development, order fulfillment and services activities in any of your locations, for any combination of your product range, in a sustainable way. And therefore paves the way for a quick industrial integration of newly acquired companies.

Product Creation & Lifetime Maintenance

Companies are facing new business challenges that go along with market mutation. You not only address standalone machines but also complete lines or plants. With many engineering & production centers worldwide you need real-time accurate & information across all disciplines to fasten your decision-making process and get to market.

Manage physical product definition efficiently across all engineering disciplines within a formal change process. Deliver the holistic and up-to-date BOMs with relevant information to ensure accurate manufacturing and services

EXPERIENCE DIGITAL CONTINUITY TO BOOST YOUR COMPANY

Product development Project management

From the Product Portfolio Management to the project reports and dashboards, you can easily miss schedule deadlines due to resource bottlenecks corrective actions.

Customers must have access to up-to-date data to better manage decision-making and avoid too many new product introduction failures.

Product Simulation

Increasing product complexity requires highly sophisticated simulation technology that can predict realistic behavior over the entire product lifecycle.

Our solution allows designers to save time and cost but also to improve quality with design-integrated simulation. Experts can now improve performance and reliability for highly complex industrial products.

Sourcing Management

Our supplier network 3D experience incorporates a bidding engine that will securely and efficiently give access to related 3D and text product data to potential suppliers in early phases of new product development. This enables and simplifies sourcing: locating new suppliers and establishing the contract if suitable.

Production Engineering

Improve first-time quality by eliminating errors and ambiguity in the shop floor with precise work instructions. We also help our customers by capitalizing & reusing their company's know-how for efficient programming. Our solution will help to lower total cost of ownership by managing single source of truth including Product / Process / Resources data integration.

Key Benefits

- Unique and worldwide data source for Product Creation and Change throughout complete product life cycle
- Leverage Lifelike Experience through virtual products to exceed customer expectations
- Fast and safe Order Fulfillment
- Fast and safe Product Development process.
- Reinforce «Ready to Use PLM Business Processes» V6 Value
- Guarantee «Lower Cost of Ownership»

EXPERIENCE IT ON YOUR MOBILE

About Dassault Systèmes

Dassault Systèmes, the 3D Experience Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 150,000 customers of all sizes, in all industries, in more than 80 countries.
